

CLAIMS

- 1
- 2 1. A portable computer comprising:
- 3 a chassis containing a data processor, an alphanumeric keyboard, a display and a
- 4 support structure;
- 5 a wrist support comprising a platform adapted to support a user's palms or wrists,
- 6 wherein said platform is slidably coupled to the support structure in said chassis and
- 7 wherein, when in use, said wrist support is movable with respect to said keyboard such
- 8 that said wrist support moves in a plane above a plane in which the keyboard is disposed
- 9 and said wrist support can move over a surface of said chassis which is in the same plane
- 10 as the keyboard, and wherein said wrist support is provided having a width substantially
- 11 equal to the width of said chassis and having a length such that when said wrist support is
- 12 in a closed position the wrist support covers a surface of said chassis which is in the same
- 13 plane as the keyboard; and
- 14 a platform which is substantially coplanar with respect to said keyboard.
